

Flathead Electric Cooperative, Inc.

RATE SCHEDULE – LGS51  
 LARGE GENERAL SERVICE – Border Loads  
 100 KW to 400 KW

AVAILABLE:

In all territory served by Cooperative in the Montana Counties of Carbon and Park.

APPLICABLE:

To members whose nonresidential electric service requirements are supplied hereunder, and whose loads have registered 100 kW or more and at the same time have not registered more than 400 kW in any two billing periods in a consecutive 12-month period.

MONTHLY BILLING:

The monthly billing shall be the sum of the Basic, Demand, Energy and Reactive Power Charges; and applicable Primary Voltage Metering and Delivery Adjustments, but not less than the Minimum Charge.

<u>Basic Charge</u>	\$56.93	single- and three-phase service, and
	\$1.16	per kW load size* for all kW
<u>Demand Charge</u>	\$2.77	per kW for all kW
<u>Energy Charge</u>	7.668¢	per kWh for all kWh
<u>Reactive Power Charge</u>	\$1.29	per kVAr
<u>Primary Voltage Delivery</u>		
<u>Discount</u>	15.0¢	per kW for all kW

\*Note: kW load size, for determination of the Basic Charge, shall be the highest non-zero monthly demand established during the 12-month period which includes and ends with the current billing month.

MINIMUM CHARGE:

The Minimum Charge shall be the monthly Basic Charge. A higher minimum may be required under contract to cover special conditions.

DEMAND CHARGE:

The Demand Charge shall be the maximum 15-minute kilo-Watt demand measured by the Cooperative's demand meter during the billing period, determined to the nearest one-tenth of a kW.

REACTIVE POWER CHARGE:

When a member has reactive load, the Reactive Power Charge shall be the maximum 15-minute reactive demand for the month in kilo-Volt Amperes in excess of 30% of the measured maximum 15-minute kilo-Watt demand for the same billing period, determined to the nearest one-tenth of a kVAr.

PRIMARY VOLTAGE METERING AND DELIVERY ADJUSTMENTS:

The above monthly charges are applicable without adjustment for voltage when delivery and metering are at Cooperative's standard secondary voltage.

RATE SCHEDULE – LGS51

LARGE GENERAL SERVICE – Border Loads  
100 KW to 400 KW

- Metering Discount: When a member’s service is delivered and metered at the Cooperative’s available primary distribution voltage, the sum of the Basic Charge, Demand Charge, Energy Charge and Reactive Power Charge will be reduced by 1.5%.
- Delivery Discount: When a member’s service is delivered and metered at the Cooperative’s available primary distribution voltage, the Primary Voltage Delivery Discount shall apply.

When a new or existing member requests delivery of power that requires a Cooperative-owned transformer(s) at a voltage other than a locally standard distribution voltage, the above charges for any month will be increased by 15¢ per kW of demand billed in the month.

Cooperative retains the right to change its line voltage or classifications at any time, and after reasonable advance notice to any member affected by such change, such member then has the option to take service at the new line voltage or to accept service through transformers to be supplied by Cooperative subject to the voltage adjustments above.

SPECIAL CONDITIONS:

Member shall not resell electric service received from Cooperative under provisions of this rate schedule to any person, except by written permission of Cooperative and where member meters and bills any of his/her tenants at the Cooperative’s regular rate schedule for the type of service which such tenant may actually receive.

CONTINUE SERVICE:

This rate schedule is based on continuing service at each service location. Disconnect and reconnect transactions shall not operate to relieve a member from the Minimum Charge.

TERM OF CONTRACT:

Cooperative may require the member to sign a written contract which shall have a term of not less than one year.

RULES AND REGULATIONS:

Service under this rate schedule is subject to Cooperative Board Policies and Procedures of which this rate schedule is a part.

General Service applies to all classes of service furnished by the Cooperative not applicable to other specific rate schedules or in rules and regulations pertaining thereto.

Deliveries at more than one point, or more than one voltage and phase classification, will be separately metered and billed. Service for intermittent, partial requirements, or highly fluctuating loads, or where service is seasonally disconnected during any one year period will be provided only by special contract for such service.
